### **CERTIFICATE OF INDEPENDENT BID DETERMINATION**

- 1 This Municipal Bidding Document (MBD) must form part of all bids<sup>1</sup> invited.
- 2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).<sup>2</sup> Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.
- 3 Municipal Supply Regulation 38 (1) prescribes that a supply chain management policy must provide measures for the combating of abuse of the supply chain management system, and must enable the accounting officer, among others, to:
  - a. take all reasonable steps to prevent such abuse;
  - b. reject the bid of any bidder if that bidder or any of its directors has abused the supply chain management system of the municipality or municipal entity or has committed any improper conduct in relation to such system; and
  - c. cancel a contract awarded to a person if the person committed any corrupt or fraudulent act during the bidding process or the execution of the contract.
- 4 This MBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.
- 5 In order to give effect to the above, the attached Certificate of Bid Determination (MBD 9) must be completed and submitted with the bid:

<sup>1</sup> Includes price quotations, advertised competitive bids, limited bids and proposals.

- <sup>2</sup> Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.

<b>THE CONTRACT</b>
---------------------

## **SECTION 6: THE SCOPE OF WORK**

### **PURPOSE OF ASSIGNMENT**

- 1.1. The department is seeking to appoint a service provider that can provide a highly qualified, skilled, and experienced team of specialists to conduct functionality audits on all the municipal financial management systems solutions used in the OR Tambo District Municipality to determine if these systems comply with the mSCOA regulations, applicable legislation and processes as indicated in the attached technical specifications.
- 1.2. These terms of reference detail the general and specific qualifications, skills and experience requirements, the work that will be expected to be performed as well as other relevant contractual and working arrangements that will apply.

### **INTRODUCTION AND BACKGROUND**

The National Treasury has pursued an aggressive financial management reform and modernisation agenda in local government since 2003 when the Municipal Finance Management Act, 2003 (Act No. 56 of 2003) (MFMA) was promulgated.

While significant progress has been made with reporting in terms of the MFMA and the Municipal Budget and Reporting Regulations (2009) (MBRR), there were still several challenges with the quality, reliability and overall credibility of municipal information.

Following the research done on the development of a potential system solution for local government and in response to this challenge, the Minister of Finance approved the publication of the Municipal Regulations on a Standard Chart of Accounts (mSCOA) (Notice No. 37577) on 22 April 2014.

mSCOA is the uniform classification framework that must be used by municipalities and their entities to capture transactions in their financial systems. Importantly, mSCOA is an organisational change reform that effects all business units with a municipality and not just a financial reform, making it one of the biggest and most complex financial reforms ever implemented in the country.

The OR Tambo district Municipality has approached DCOG for financial assistance to purchase an upgraded and improved financial management ICT system through the MSIG allocation. However, with the purchasing of any new financial management ICT system due diligence assessments need to be undertaken inline with the mSCOA requirements.

## **PROBLEM STATEMENT**

After the promulgation of the mSCOA Regulation, municipalities had a three-year preparation period to comply with the Regulation by 01 July 2017. This included upgrading or procuring financial management and internal control systems that enables compliance with the mSCOA requirements. To assist municipalities with the procurement of mSCOA enabling systems, the National Treasury issued transversal tender RT25-2016.

It should be emphasized that all core municipal financial systems should have complied with the mSCOA requirements by 01 July 2017. By now, municipalities should:

- a) Have acquired and upgraded the hardware, software and licences required to be and remain mSCOA compliant;
- b) Budget, transact and report on all six (6) legislated mSCOA segments and directly on the core financial system and submit the required data strings directly from this system to the local government portal;
- c) Lock down the budget adopted by Council on the core municipal financial system before submitting the budget (ORGB) data string to the local government portal;
- d) Closed the core financial system at month-end as required in terms of the MFMA before submitting the monthly data string to the local government portal; and
- e) Generate the regulated Schedules (A, B, C) directly from the core municipal financial systems.

## **SCOPE OF THE ASSIGNMENT**

To appoint a service provider that can provide a highly qualified, skilled, and experienced **team** of consultants to conduct on-site functionality audits on all the core municipal financial management and systems solutions available in the market to determine if these systems comply with the *mSCOA* regulations, applicable legislation and processes as indicated in the attached technical specifications and within the required timeframe.

### ***Specific Scope of Work***

The following project outputs are required:

- Arrange and conduct functionality audits on the all core municipal financial management and internal control systems solutions to determine if:
  - The municipal systems of financial management:
  - Provide for the hosting of the *mSCOA* structure and associated detail as contained in the 7 defined segments.
  - Accommodate and operate the classification framework across all 7 segments at a transactional level in the core financial management system (i.e. the transaction originates in the core financial system and not in any legacy system or manually outside of the core system).
  - Provide for the data extraction functionality as per the segmented transactional string and upload to the local government portal and do not apply methodologies of data mapping to provide for the segmented transactional data string at a transactional level or manual intervention outside if the core system.
  - The following seven main business and process components integrate seamlessly with the *mSCOA* general ledger and comply at a posting level to the *mSCOA* Regulations and GRAP:
    - Comply with the following fifteen major business processes and technical requirements to ensure not only *mSCOA* compliancy, but also address the broader requirements of a system of financial management and internal control within a South African local government context:
      - Corporate Governance;
